Professional Experience

ConGlobal **July 2023 – Present**
Assistant Terminal Manager *Houston, TX*

- Lead daily intermodal terminal operations, coordinating train planning, yard activity, staffing, and equipment readiness to support safe execution, productivity, and service commitments.
- Apply hands-on experience with ITOS, MyUPRR, NetControl, and VMU, along with prior OASIS experience, to support operational visibility, planning, and execution.
- Analyze terminal workflows, identify process and system gaps, and translate operational needs into functional requirements, business rules, and practical software improvements.
- Develop and refine tools for dwell forecasting, yard planning, and shift readiness, incorporating track capacity, outbound commitments, labor availability, and changing operating conditions.
- Test operational tools against real-world scenarios, validate calculations and data accuracy, and troubleshoot workflow issues to improve reliability and usability.
- Coordinate with railroad stakeholders, dispatchers, yard crews, and terminal leadership to communicate priorities, resolve operational exceptions, and align resources with execution requirements.
- Train and support terminal personnel on operating procedures, equipment use, and safety expectations, translating complex requirements into clear guidance that strengthens accountability and consistent execution.

ITS Technologies & Logistics **November 2019 – July 2023**
Senior Operations Manager *Houston, TX*

- Orchestrated the daily flow of railcars, containers, and trailers across inbound, outbound, and switching operations, keeping freight moving on time and equipment positioned where it needed to be.
- Built and scaled a high-performing terminal workforce, aligning staffing levels, shift structure, and cross-training plans to meet growing lift volumes and tightening service windows.
- Turned raw operational data into decisions by tracking KPIs across dwell time, gate turns, lift productivity, and on-time performance to identify bottlenecks before they became service failures.
- Held the line on customer commitments by enforcing train and car handling plans that kept dwell times low and performance metrics in check.
- Directed crane, top handler, reach stacker, and hostler operations across a live intermodal yard, balancing lift productivity with safe equipment handling in a 24/7 environment.
- Developed terminal employees from the ground up, putting people behind cranes, top-loaders, side-loaders, hostlers, and forklifts to build the kind of skilled workforce that keeps a yard running without constant oversight.
- Led accident and incident investigations end to end, digging into root causes and driving corrective action plans that produced lasting results.

Envent Corporation **June 2018 – Oct. 2019**
Technician 2 / Crew Leader *La Porte, TX*

- Coordinated and led chemical tank degassing, vapor control, odor control, and wastewater treatment projects at various refineries, processing plants, and terminals across the gulf coast.
- Provided effective communication with clients to ensure job priorities and quality service is maintained.
- Educated new employees on state-of-the-art thermal oxidizer systems, carbon vessels, and liquid scrubber systems to treat hazardous vapors and contaminated wastewater.
- Provided project management support such as analyzing P&ID diagrams, obtaining essential permits, staging critical equipment, and monitoring their operation.
- Recorded all data required by local and federal safety agencies and maintained a complete log of field notes and critical data for client and company records.

Kaneka Corporation **January 2017 – May 2018**
Laboratory Technician *Pasadena, TX*

- Self-managed multiple projects while maintaining close customer relations to ensure analysis, execution, and results were submitted in a quick turnaround.
- Synthesized and tested various combinations of polymers with MX modifier material utilizing instrumentation such as GCMS, DSC, HPLC, UV/Vis spectroscopy, Fischer titrations, and other critical QC lab equipment.
- Assured proper handling and disposal of hazardous materials and hazardous waste.

Education

University of Houston – Clear Lake **December 2016**
Bachelor of Science Degree in Chemistry *Houston, TX*

San Jacinto College **December 2011**
Associate degree, Chemistry/Mathematics *Pasadena, TX*
